Let me take away your physicalities

One little warm death coming up

F#11-

One little warm death with me tonight

G7+ A4 D7+

A little sweet death

One little cherry breathless mist

Feels like eternity,

There's nobody here, Just you and me

One little warm death coming 'round

One little sweet death with me tonight

In and out of stages

G7+

Like the fazes of the moon

D7+

It can shine so brightly

G7+

Let the fullness soon come soon come soon

D7+

But now I feel you near me

B7- E7

See you much more clearly

I can hardly wait to

G7+

Feel you moving through my world oh my world

Isn't deep without you

One little warm death... Come have one (x3)
